

## Features

- Ultra low quiescent current: 3.5 $\mu$ A (typ.)
- High input voltage (up to 12V)
- Output voltage:  
1.8V, 2.5V, 2.7V, 3.0V, 3.3V, 3.5V, 5.0V
- Output voltage accuracy: tolerance  $\pm 3\%$
- Maximum output current: 250mA
- Low dropout voltage
- Low temperature coefficient
- TO-92, SOT-89 package

## Applications

- Battery-powered equipment
- Voltage regulator for microprocessor
- Voltage regulator for LAN cards
- Wireless Communication equipment
- Audio/Video equipment

## General Description

The HT73XX series is a set of three-terminal, low power, high voltage regulators implemented in CMOS technology. The series features extremely low quiescent current which is typically 3.5 $\mu$ A. They allow input voltages as high as 12V. The device provides large current with a significantly small dropout voltage.

The HT73XX consists of a high-precision voltage reference, an error correction circuit, and a current limited output driver. They are available with several fixed output voltages ranging from 1.8V to 5.0V. CMOS technology ensures low dropout voltage and low current consumption. Although designed primarily as fixed voltage regulators, these devices can be used with external components to generate variable voltages and currents.

## Selection Table

Part No.	Output Voltage	Package	Marking
HT7318	1.8V	TO-92 SOT-89	73XX-A (for TO-92) 73XX-A (for SOT-89)
HT7325	2.5V		
HT7327	2.7V		
HT7330	3.0V		
HT7333	3.3V		
HT7335	3.5V		
HT7350	5.0V		

Note: "XX" stands for output voltages.

For lead free devices, TO-92 package will add a "#" mark at the end of the date code, whereas SOT-89 package will add a "#" mark at the end of the marking.

## Block Diagram

## Pin Assignment

## Absolute Maximum Ratings

Supply Voltage .....	V <sub>SS</sub> -0.3V to V <sub>SS</sub> +14V	Storage Temperature .....	-50°C to 125°C
Power Consumption (*1) .....	500mW	Operating Temperature .....	-40°C to 85°C
Power Consumption (*2) .....	500mW		

Note: These are stress ratings only. Stresses exceeding the range specified under "Absolute Maximum Ratings" may cause substantial damage to the device. Functional operation of this device at other conditions beyond those listed in the specification is not implied and prolonged exposure to extreme conditions may affect device reliability.

\*1: applied to TO-92

\*2: applied to SOT-89

## Electrical Characteristics
