

# Infrared Receiver Module

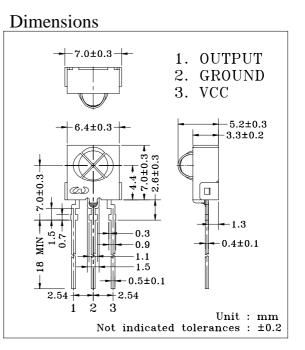

## Module No.: PIC-1010

### 1. Features:

- $\geq$ Miniature size
- Built-in exclusive IC  $\triangleright$
- $\triangleright$ Wide half angle & long reception distance
- Good noise-proof capability  $\triangleright$
- High immunity against ambient light  $\geq$
- $\triangleright$ High protection ability to EMI
- Back Metal Cover  $\triangleright$
- $\triangleright$ Side view
- $\succ$ Mesh
- Wide voltage operating:  $2.7V \sim 6.5V$  $\geq$

## 2. Applications

- AV instruments (Audio, TV, VCR, = CD player)
- Home appliances (Air-conditioner, Fan, Light.)
- Remote control for wireless devices

# Infrared Receiver Module

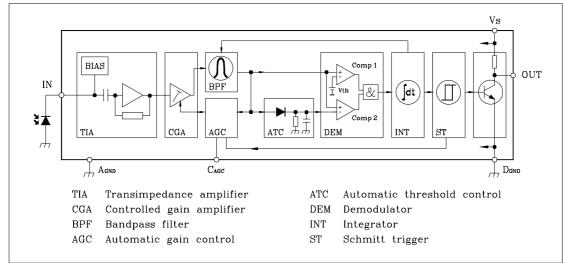

## Module No.: PIC-1010

In case of noisy power supply, please serially insert 100 $\Omega$  resistor and about 47 $\mu$ F electrolytic capacitor in Vcc line and ground as follows:-

## **Block Diagram**

## Standard Inspection

Among electrical characteristics, total quantity will be inspected as below:-

- Distance between emitter and detector
- ⊙ Current consumption
- ⊙ H level output voltage
- $\odot$  L level output voltage

## Infrared Receiver Module

## Module No.: PIC-1010

## Testing Method

Distance between emitter and detector specifies maximum distance that output waveform satisfies the standard (FIG-3) under the conditions below against the standard transmitter.

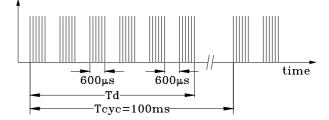

- a. Measuring place Indoor without extreme reflection of light.
- b. Ambient light source Detecting surface illumination is 200±5Lux under ordinary white fluorescence lamp of no high frequency lightning.

c. Standard transmitter

Transmitter wave indicated in FIG-2 of standard transmitter is arranged to satisfy Vo≥50mVp-p under the measuring circuit specified in FIG-3

Standard Transmitter FIG-1

Test Signal

Tcyc-Td>25ms is recommended for optimal function

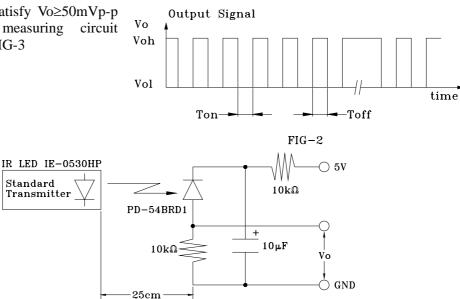

FIG-3 Power Output Measurement Circuit

### Precautions for Use

- a. Store and use where there is no force causing transformation or change in quality.
- b. Store and use where there is no corrosive gas or sea (salt) breeze.
- c. Store and use where there is no extreme humidity.
- d. Solder the lead pin within the condition of ratings. After soldering, do not add exterior force.
- e. Do not wash this device. Wipe the stains of diode side with a soft cloth. You can use the solvent, ethyl alcohol, or methyl alcohol only.
- f. To prevent static electricity damage to the pre-amp, make sure that the human body, the soldering iron are connected to ground before using.
